

Rosso

This wine expresses a very complex aromatic profile ranging from the cherry and fragrant fruit notes of Merlot to the spicy notes of Syrah.

Production area

The grapes are produced in our Sicilian wineries of Sambuca di Sicilia and Acate where the climatic conditions and the diverse composition of the soil have favoured a perfect adaptation of the international varieties. Syrah and Merlot vines are in fact cultivated on sandy soil and they produce grapes which are very aromatic and rich in sugar.

Grapes Syrah, Merlot

Characteristics

This wine expresses a very complex aromatic profile ranging from the cherry and fragrant fruit notes of Merlot to the spicy notes of Syrah. As well as being the main structure of the body of this intriguing Sicilian blend Cabernet then brings in a hint of small, dried fruits and a touch of vanilla coming from the ageing in barriques. The structure is very pleasing thanks to a perfect balance between Cabernet's tannins and the residual sugar given by Merlot and Syrah which, together, make the wine viscous, rich, full bodied and smooth at the same time.

Pairings: this wine is perfect to serve with moderately spicy

Rosso

salami, rich and succulent first courses, cooked and grilled red meats as well as moderately mature cheeses.
